

# TRV 4 *Design*

## The exclusive thermostatic head

HEATING

The TRV 4 Classic thermostatic head is very appealing due to its exclusive and elegant design and makes every radiator look like a work of art. The Design TRV is available in a variety of attractive versions. Not only does the appearance speak for this Design TRV, but also the reliable and proven technology inside. Years of experience in room temperature controls have been unified in this product.

With a metal ring nut connection of M 30 x 1.5 the TRV 4 is suitable for most market standard valves.

## Function:

The TRV 4 is a self regulating room temperature control device, which regulates the warm water flow rate in the radiator dependant on the heating need within a room. The TRV 4 does'nt only look good, but also meets excellent quality standards according to testing by EN 215 and manufacturing under ISO 9001.

You have the choice from a wide range of attractive designs

## Usage:

The setting range is seperated into zones \* & 1–5, max.. Because these TRV's are accurately adjusted it is possible to exactly set the desired temperature between 7...31 °C. By using the limiting pins on the rear side of the bezel the setting range can easily be limited, which makes it suitable for areas accessible to the public.

Liquid temperature sensor

Setting range 7...31°C

Spec. stroke > 0.2 mm/K

Frost protection symbol marked by 7°C

permitted storage, transport and surrounding temperatures -20 to +60°C

Max. heating medium temperature 120°C

Ring nut connector M 30 x 1.5

Stroke 11.5 ± 0.1 mm

## Accessories

Product	Type	Product code
Remote sensor chrome 2 m capillary	TRV4 L2chs	2036 01
Remote sensor gold 6 m capillary (on request)	TRV 4 L6go	2036 02
with remote transmitter for remote setting 2 m capillary	TRV F2	2039 02
with remote transmitter for remote setting 6 m capillary	TRV F6	2039 06
Anti-theft device (heavy Version) for high demand	ETD 2	2053 02
Key for anti-theft device	DSW	2054
